

Dear Dr. Luiz Darcy Gonçalves Siqueira President of the AMHB
Brazilian Homeopathic Medical Association

We have become aware of the defamation campaigns towards homeopathy in Brazil's media. The Liga Medicorum Homoeopathica Internationalis -LMHI- extends its unconditional support to our colleagues.

These defamations originate from the ignorance about the scientific evidence of homeopathy which is easily accessible in the Scientific Framework of Homeopathy document available on the LMHI website (www.lmhi.org), or by the ill intent coming from vested interests to discredit a specialty that shows its efficiency daily.

Brazil is an exemplar of the highest level in the teaching, research, and practice of homeopathy integrated into the national health system and the LMHI recognizes the AMHB for the task it carries out to fulfill such purposes and being a standard bearer for the world. Likewise, if you consider appropriate any intervention by LMHI before the Brazilian medical/health authorities, we make ourselves available to the AMHB for this purpose.

As proven, by the over two centuries of clinical use, homeopathic medicine is clinically and cost effective, and it encompasses several levels of complexity, from over-the-counter use to its use in highly specialized areas, such as Internal Medicine, Pediatrics, and Psychiatry; therefore, it is essential that comprehensive specialty training is available for those professional who want to provide a high level of healthcare when using homeopathic medicines.

We cordially greet you and, on your behalf, all our Brazilian colleagues.

Altunay Agaoglu, MD.
President, LMHI

Bernardo Merizalde, MD.
Vice-President, LMHI

Gustavo Cataldi, MD
Past-President, LMHI

Bernhard Zauner, MD.
General Secretary, LMHI
